

DollarBot is a user-friendly Telegram bot that lets you track your daily spending, all on your own local system.

- **Effortlessly** add, edit, and delete expenses **on the go**, and set budgets to **stay in control** of your finances.
- Get **detailed insights** into your expenses over time, spending history, and more using easy-to-read graphs & visuals for **planning your finances**.
- **DollarBot** will identify trends in your expenses and predict future spending based on current patterns, allowing you to make informed decisions and **smarter financial planning**.

Current Features

- Using machine learning techniques, our **predictive analytics** enhance the accuracy and efficiency of expense predictions.
- Send emails to (who?) with **Email Notification Commands**
- Weekly & monthly **analysis commands** to give users a comprehensive analysis of their expenses.
- Users can **take charge** of their spends with the ability to **manage expense categories**. Categories can be added, edited, or deleted as they want, when they want.
- Users can **track recurring expenses**, allowing them to manage regularly occurring financial commitments.
- 100+ testcases covered!

Future Improvements

- **Export CSVs and PDF:** Enable exporting expenditure details to CSV or PDF files for easier sharing and analysis.
- **Multicurrency Support:** Manage finances in different currencies, with real-time currency conversion for cross-currency transactions.
- **Expense Splitting:** Share and split expenses among multiple users to keep track of shared financial obligations.
- **Debt Simplification:** Simplify tracking of debts and settlements, making it easy to manage who owes whom.
- **Integration with Google Calendar:** Sync your expenses with Google Calendar
- **Gamification:** Encourage smart financial decisions with rewards, achievements, and challenges that make managing money more engaging.

Group 82

Team Members: Atharva Pansare (aspansar), Ashwin Satpute (aasatput), Soham Patil (spatil6)
