

Smart To-Do

The Only Todo List you need!

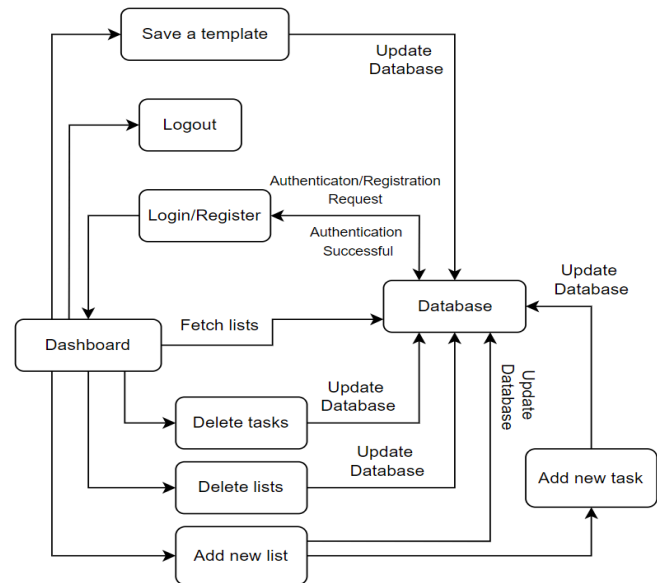

INTRODUCTION

- Smart To-Do is an easy-to-use application that keeps track of all the user tasks and deadlines.
- With Smart To-Do, users can create templates and grouping tags for their tasks, allowing them to categorize and initiate tasks quickly.
- Users can track the progress of their tasks by adding and updating the statuses.

USER WORKFLOW

- The website offers a standardized login page where existing users can sign in directly or register as new users.
- New users are provided a blank workspace, existing users can see their lists after logging in, where they can add and manage their tasks.
- On selecting a task, the user can see the list and task name on the top-right side and add side notes to it.
- Users can also delete a task just by clicking the x mark besides the task.
- On completion of the task. Users can check the task to mark it completed and also see the time it took to complete the task.
- Users also have an option to give some tag to list and add a color to the tasks as well as save the template.

FLOWCHART

FUTURE ENHANCEMENTS

- Home Page and UI modifications.
- Adding a calendar view.
- Incorporating Sorting based on tags.
- Alert functionality via Email for upcoming dates.
- Making different views for different workspaces.
- Sharing the workspace via Email/Notification.
- Systematic Redirection for different lists.
- Recommendations for templates and tasks.
- Subtasks for better task categorization.
