

PopCorn Picks

What's It?

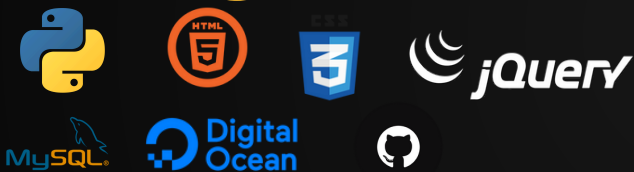

At Popcorn Picks, we reinvent the movie-watching experience by providing customised suggestions based on your individual preferences. With our constantly growing library and strong recommendation system, you can easily find both well-known favourites and undiscovered gems. Designed for movie aficionados, Popcorn Picks gives lightning-fast choices, intelligent reviews, and seamless accessibility across all platforms. You may quickly enter a world of cinematic experiences thanks to our user-friendly setup. Use Popcorn Picks to enhance your movie selections; each recommendation is your next fantastic movie!

How's It?

- **Personalized Movie Recommendations:** Receive tailored movie suggestions based on your unique viewing preferences.
- **Movie Rating and Review Feature:** Rate and review films to share your thoughts and insights with the community.
- **Dashboard for Viewing Reviews:** Access a user-friendly dashboard to view and manage your movie reviews in one place.
- **Friend Activity and Reviews:** Stay updated on your friends' movie activities and read their reviews for additional recommendations.
- **Email Delivery of Movie Lists:** Get curated movie lists delivered straight to your email for convenient viewing.
- **User Profile and Preferences Storage:** Store your profile information and viewing preferences for a customized experience.

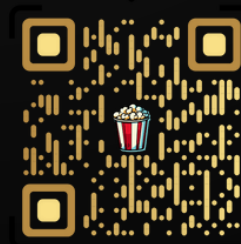

Coding Arsenal

We promise ...

- **User-Specific Actions:** Create a watchlist, mark favorites, view watch history, and share recommended movies with friends while accessing detailed analytics on your viewing habits.
- **Dedicated Movie Pages:** Each film in the database has its own page showcasing essential details like release year, poster, ratings, and more.
- **Enhanced Recommendation Algorithm:** Experience more accurate and personalized movie suggestions with our improved recommendation algorithm.
- **Advanced Search Filters:** Utilize versatile search filters for year, genre, and rating, and sort results by year, alphabetical order, or rating for a tailored browsing experience.
- **Frontend Overhaul:** The current frontend uses jQuery, which is becoming outdated, so transitioning to a component-based architecture like React, Angular, or Blazor would improve functionality as the program evolves.
