

# DOLLARBOT

- Introducing DollarBot – your hassle-free expense tracker right at your fingertips!
- No more complicated apps or manual tracking – DollarBot is a simple yet powerful Telegram bot designed to make managing your daily expenses effortless.

## WHAT'S NEW

### Dual Account Management:

- Track your expenses in two separate accounts – checking and savings. Seamlessly switch between accounts.

### Multi-Currency Support:

- Log expenses and balances in multiple currencies including USD, INR, GBP, EUR, and more.

### Export Expenses:

- Download your spending records in CSV for spreadsheet analysis, or in PDF for a more portable and professional format.

### Balance Alerts:

- Stay informed with real-time alerts if your account balance drops below a preset threshold. Receive notifications via Telegram messaging and email.

### Enhanced Visualization:

- Gain better insights with newly added pie charts and bar graphs for a clearer understanding of your spending. track daily and monthly expenses.

## FUTURE SCOPE

### Milestone 1: Enhanced UI/UX Design

- Incorporating modern design frameworks such as HTML, JavaScript, and React. This integration will not only enhance the aesthetics but will also create a smoother and more interactive user experience.

### Milestone 2: AI & Machine Learning Integration

- DollarBot will leverage AI and ML to offer personalized financial insights. Analyzing spending patterns will provide tailored saving advice higher-than-usual spending detected.

### Milestone 3: Cloud-Based Data Management

- To ensure security, scalability, and seamless monitoring, we plan to integrate cloud storage for better database management.

### Milestone 4: Image-Based Bill Analysis

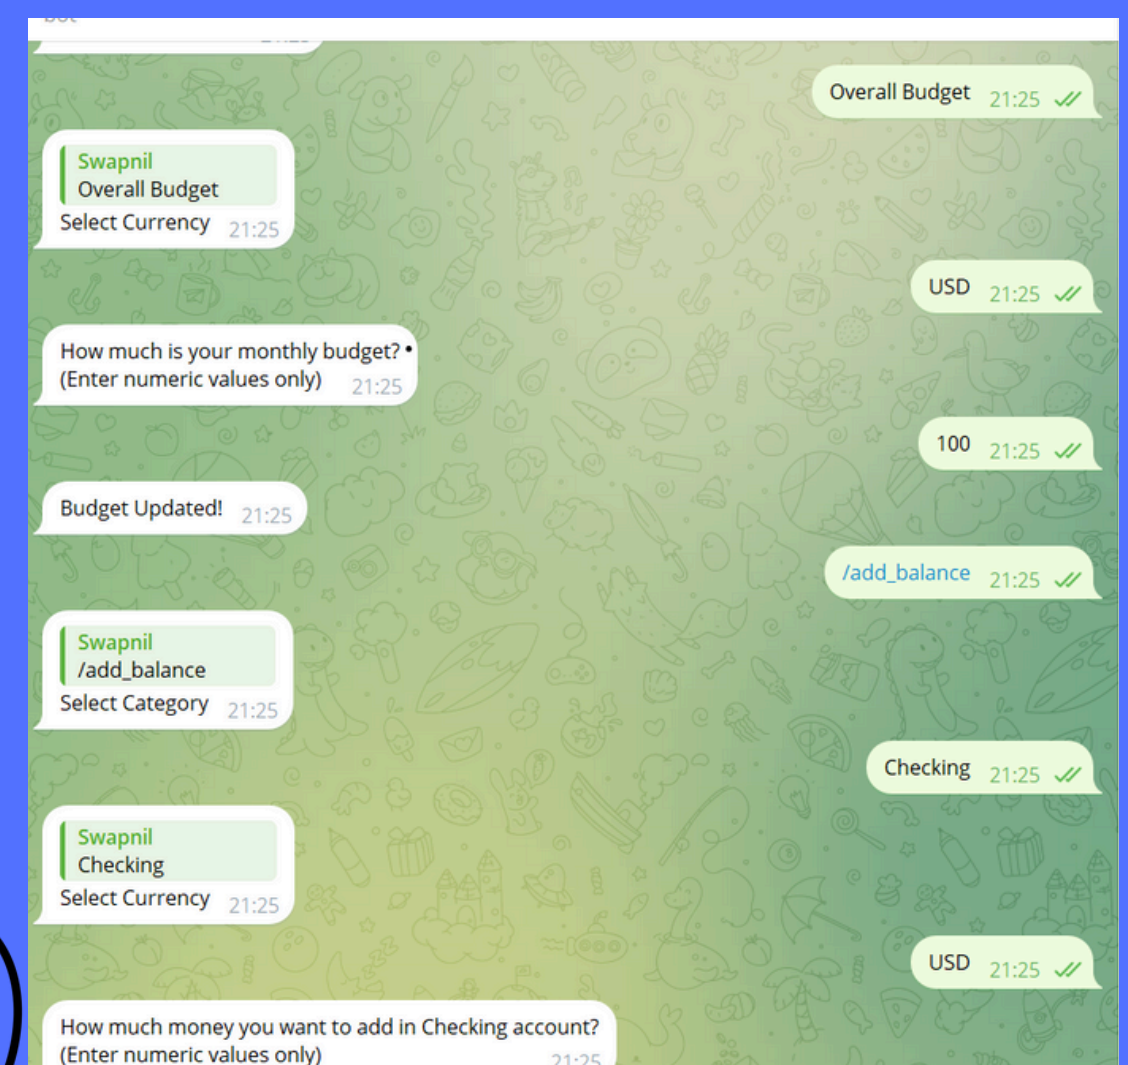

- A future feature will involve the addition of physical bills through image uploads and analysis of amount through advanced image processing.
