MOVIE RECOMMENDER

1

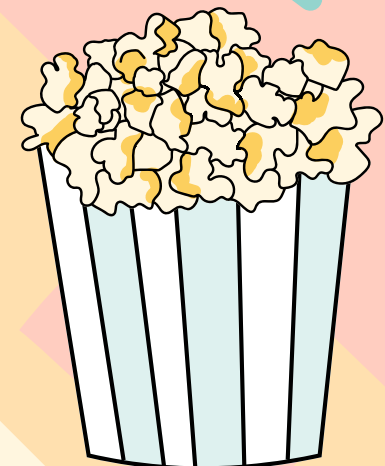

THE CONCEPT

Welcome to the Movie Recommender, your go-to solution for personalized film suggestions. By simply sharing your preferred genres, our intelligent system curates a list of ten must-watch movies tailored to your tastes. Say goodbye to the hassle of choosing a movie for your next viewing session. Our Movie Recommender saves you time and enhances your experience with exciting, relevant recommendations.

2

NEW & IMPROVED

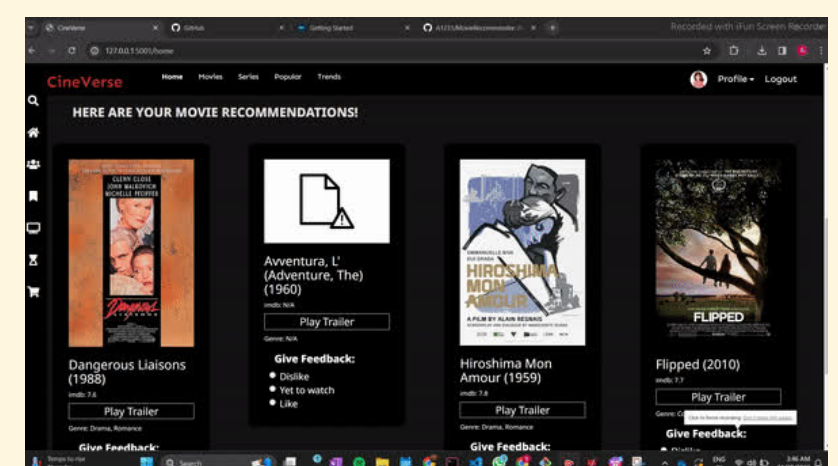

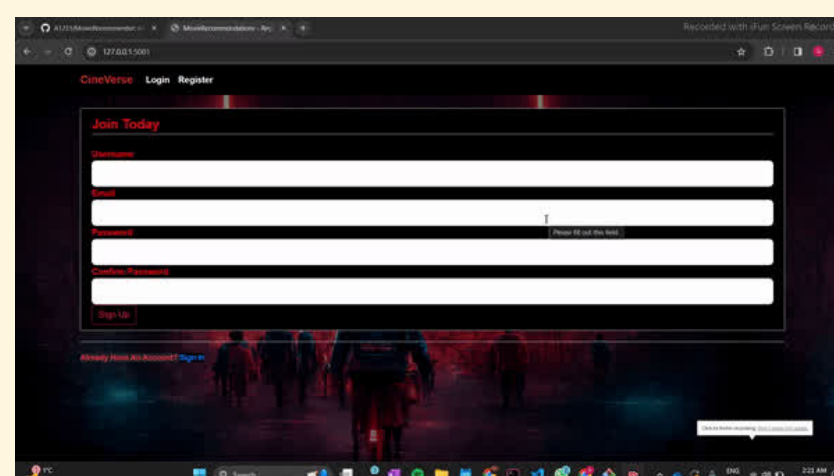

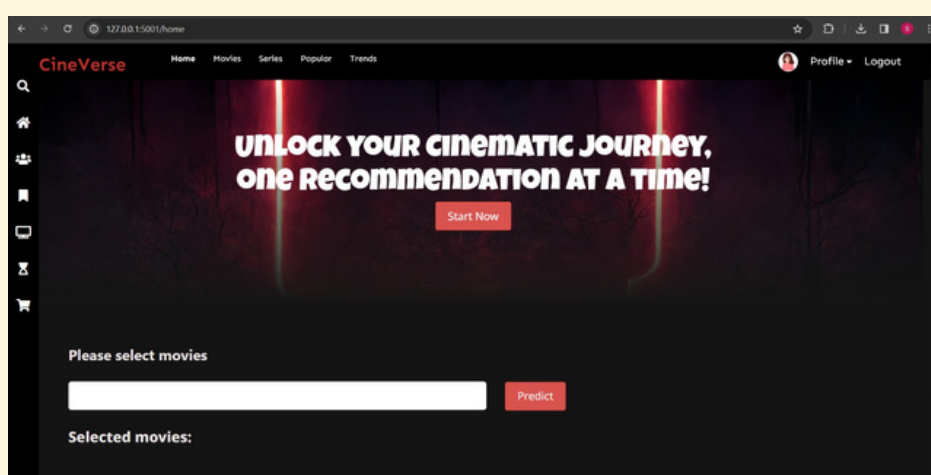

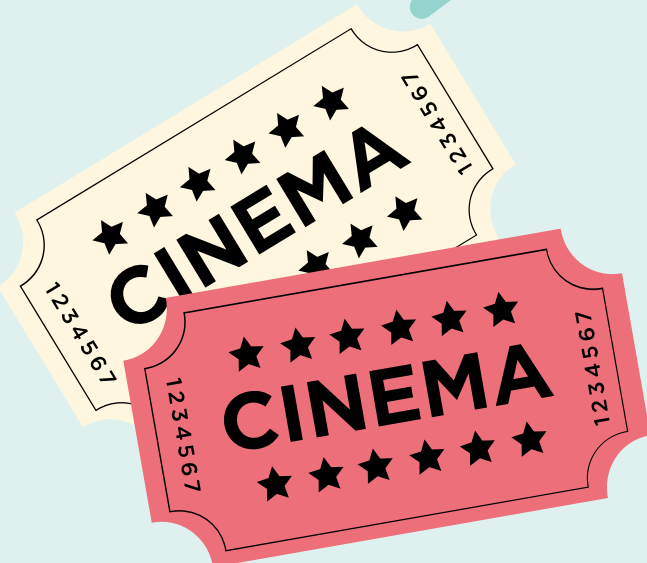

1. **YouTube API Integration:** movie trailers for recommendations.
2. **User Authentication:** user register and login functionality.
3. **Account Creation:** Access Liked, Disliked, and To-Watch movies.
4. **Database Integration:** Stored user data and movie info using SQLAlchemy.
5. **UI Enhancement:** Improved user interface design.
6. **Bug Fixes:** Resolved issues with movie feedback and recommendations.

3

UPCOMING!!

1. **User-Specific Features:** Enhanced email verification, added social features (follow, comment, reviews, email notifications), and a watchlist for saving or liking movies.
2. **Enhanced Search:** Search by actor, genre, plot, or image using LLM (e.g., ChatGPT).
3. **Personalized Recommendations:** Integrated user feedback for evolving suggestions.
4. **Platform Deployment:** Deployed for public access on a server.
