

# Movie Recommender

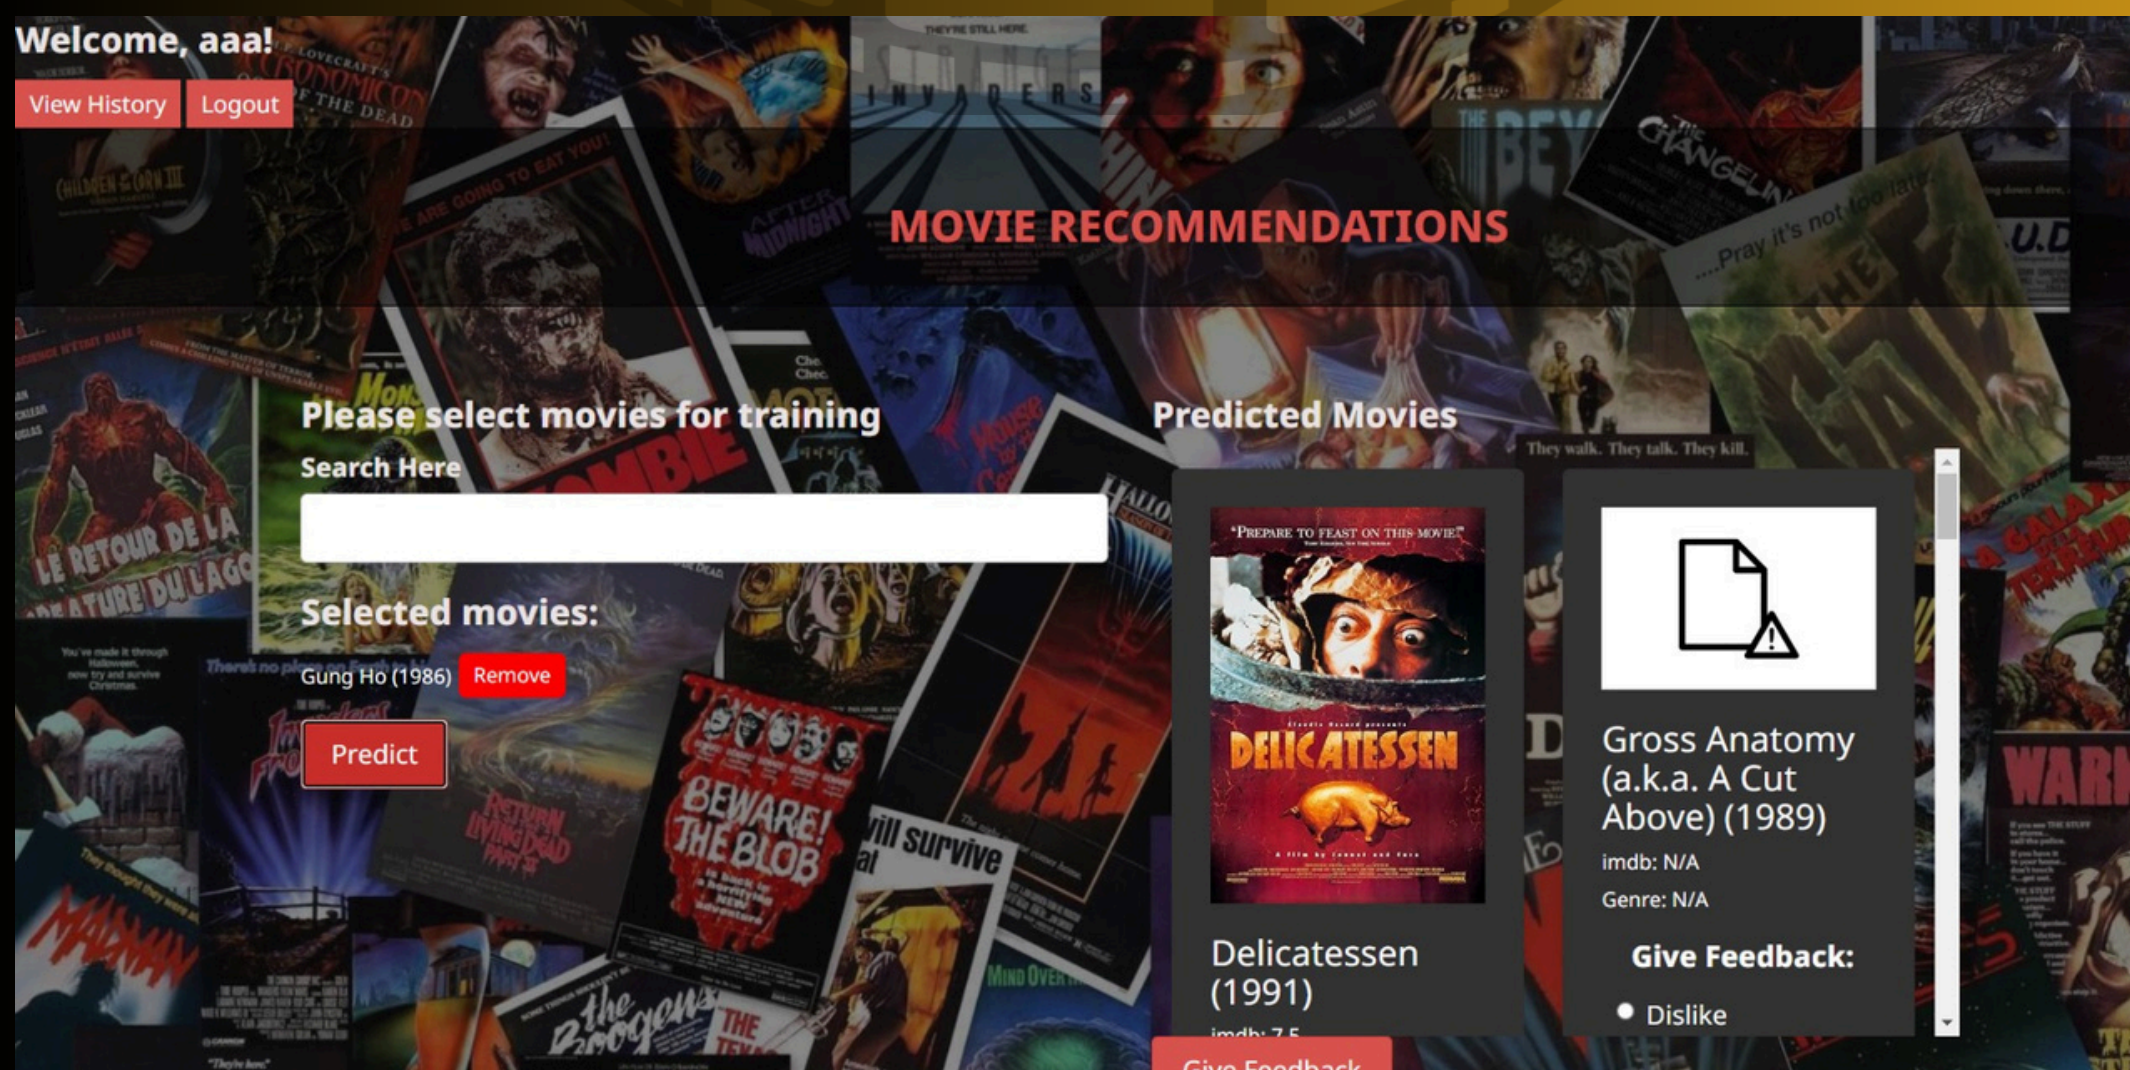

## About

Movie Recommender is an application that recommends movies based on movies that you liked before. Just give it a list of movies and it will analyze these movies and give you a list of 10 similar movies tailored to your taste. It can also take your feedback on these chosen movies to understand your preferences further. It can save you the hassle of researching hundreds of movies' Wikipedia pages to choose a movie to watch!

## Future Enhancements

- Match percentage and ranking on the recommended movies
- Advanced Filtering Options such as genre
- Notification System: Implement real-time alerts for new movie releases and personalized notifications based on user preferences.

## System Interface

## Team 51

- Ajith
- Krishna
- Suhas
