

# CAREER PULSE TRACKER

## TESTING STRENGTHS

### Backend Tests:

- The backend includes multiple test cases covering core functionality such as user login, job board retrieval, and project management features.

### Frontend Tests:

- The app contains automated tests for the user interface to ensure features like drag-and-drop functionality and form validation work smoothly

## MAIN FEATURES

### Job Application Tracking:

- Keep a detailed record of all job applications, wish lists, and upcoming opportunities.

### Project Management Integration:

- Use flexible boards to track both job applications and personal projects.

### Progress Updates:

- Track your job search progress with a drag-and-drop interface and stage assignments.

### Secure Data Storage:

- Your data is securely stored in a persistent database, ensuring privacy and accessibility.

### Customizable Workflow:

- Create and modify columns, stages, and task titles to fit your personal job search process.

REPO

## IMPLEMENTATION MILESTONES

### Resume & Document Management

- **Goal:** Link specific resumes and cover letters to job applications.
- **Plan:** Implement document upload with version control for managing multiple versions.

### Deadline Reminders & Notifications

- **Goal:** Add reminders for application deadlines and interviews.
- **Plan:** Build a backend system for deadline tracking and a notification system for alerts.

### Google Calendar Integration

- **Goal:** Sync reminders with Google Calendar.
- **Plan:** Integrate Google API for calendar sync and implement OAuth for secure account linking.

## DEMO:

- Scan the QR code to watch the demo video.
- Below are snapshots of the running systems. screen snaps of the running system.
