

# WolfLease

Are you having trouble finding homes which are on sublease?  
Or are you looking for someone to sublease your apartment?  
WolfLease is here to help!

## Objective

The objective of WolfLease is to streamline the subleasing process by connecting tenants and landlords, providing secure lease management, and enhancing transparency through ratings, reviews, and clear tenant guidelines.

## Features

- A centralized platform that helps you easily find subleases with available dates, all in one place.
- Use a variety of filters to quickly discover listings that perfectly match your needs and preferences.
- Get the chance to view detailed profiles of potential roommates with whom you'll be sharing the apartment.
- Set your personal preferences, such as whether you prefer a smoking or non-smoking environment, before committing to a sublease.
- Let subleasers know you're interested in their room by expressing interest directly through the platform.

## Future Scope

- Implement secure online lease signing so users can safely sign leases through the platform.
- Include landlord ratings and reviews to help students find apartments with good landlords.
- Send email notifications for new sublease listings or when someone applies for a sublease.
- Add a section explaining tenant rights, obligations, and frequently asked questions about subleasing.
- Create dashboards for landlords to track interest in their properties.
- Add docker containerization for ease of deployment and scaling.
- Improve user experience by designing an engaging user interface.
