OBJECTIVES

Introduction

- Finding a lease can be challenging and time-consuming, leading to a rise in subleasing for short-term rentals.
- WolfLease simplifies the search for apartments with available sublease rooms, allowing users to move in quickly.
- Users can filter options based on location, amenities, sublease start and end dates, and more!

OBJECTIVES

Front-End: 20+ Test cases can be made

Back-End: 15+ Test cases can be made

A total of 35+ test case for the project

- Simplify Sublease Search:** Make it easy for users to find short-term rental options that meet their specific needs.
- Enhance User Experience:** Provide detailed listings with comprehensive property details, reviews, and visuals.
- Increase Tenant and Property Owner Engagement:** Introduce features like automated notifications, tenant reviews, and seamless document management to streamline the leasing process.
- Accelerate the Leasing Process:** Enable quick application, screening, and leasing to reduce time and effort for both tenants and property owners.

MILETONES

- Enhanced Property Listings:** Design and implement a user-friendly property listing template with descriptions, images, amenities, and information about the utilities.
- Tenant Review System:** Develop a review and rating feature, allowing tenants to provide feedback on properties for future renters.
- Notifications:** Set up automated email/text alerts for new listings, application status updates, and lease renewal reminders to keep users informed.
- Document Management:** Enable secure document upload and sharing for rental agreements, ensuring an easy and safe way to manage important files.
