WolfComplain 2.0

Admin and Student Portal

Admin and Student have different logins and the admins get graphs shown for the performance for past 6 months. Transferring a complain to principal if found unsolvable by teachers.

Filtering College Feed

The college feed page now has filters to improve user experience and make it easier to search for a specific feed. There are three main filters on the application: department, type of feed, and college the feed is affiliated with.

Complaint Management and History

Post complaints about certain topic and also view the previous complaints and their responses. Admin view for complaints and status view of all the complaints posted and the answers by the students.

Pagination of Search and Complaints

Pagination is the process of displaying the data on multiple pages rather than showing them on a single page. Long pages take more time to load, and infinite pages need to load while the user scrolls, although this process isn't always flawless.

Personalized Dashboard

Dashboard catered to the user and viewing the essential complaints and their responses. Viewing Solved, Rejected and Pending Complaints

About

WolfComplain3.0 is an online platform used to organize and streamline doubt solving and class discussions for students at NC State University. It provides a centralized space where students can easily track all their questions and view doubts raised by their peers across various courses. By incorporating a tagging system, users can quickly identify the status of their inquiries and find relevant resources without the clutter often found in traditional learning management systems like Moodle. With WolfComplain3.0, students save valuable time by minimizing the need to navigate multiple platforms, allowing them to focus on their studies and enhance their learning experience. This platform fosters collaboration among students and faculty, ultimately creating a more productive and supportive educational environment.

Future Scope

Email Notification on Complaint Resolution

An email notification sent to the student who has raised a complaint stating that the complaint has been resolved and can be viewed by logging in to the system. Response of the complaint can also be viewed through the email recieved.

Bookmark Complaints of other Students

Bookmarking or saving the complaints posted by other students for personal references and then viewing them whenever needed. Sorting and Searching in the saved complaints and filtering the complaint types in the bookmark section

Graphical Analysis of Complaint Response Time

Provide a graph indicating the time taken by the professor to respond to the complaints. A six month graphical visualization for the professor to analyze the performance through the months.
