WHAT ARE WE?

ShopSync is your ultimate ally in the quest for the best bargains!

ShopSync is a publicly accessible web API framework designed for convenient price comparison across popular e-commerce platforms. It supports well-known websites such as Amazon, Walmart, Target, BestBuy, Costco, and eBay.

NEW FEATURES

- 1.Added **Chrome Extension**.
- 2.Integrated a **Docker Image** for streamlined and efficient containerized deployment.
- 3.Improved scraping functionality and **expanded data sources**.
- 4.Implemented an advanced filter with ordering options for all columns for **more tailored user experience**.
- 5.Incorporated a Rakuten cashback column to provide users with **valuable shopping insights**.

UPCOMING FEATURES

- 1.**Improved UI** for enhanced User Experience.
- 2.**User Profiles** to track favorite items and wish list!
- 3.**User rating system** independent of product reviews on other sites so we know what ShopSync users think of the products.
- 4.**Price drop notifications** so users are alerted when an item they are looking for drops its price.
- 5.**Recommendations** for users with accounts based on their activity!

TEST CASES

8 tests with 100% code coverage: this is something to further expand on and is a great way to learn about the importance of testing!
