Member 2 - Rajasri Bhagam, rbhagam@ncsu.edu

Project 1: Movie Match

Project 2: PackTravel

MOVIE MATCH

Movies You Love, Suggestions You'll Crave!

INTRODUCTION

Discover movies you'll love with personalized recommendations, curated just for you. Whether it's the latest blockbuster or a hidden gem, our app simplifies finding your next favorite movie.

WHAT'S NEW?

- **Wishlist:** Save movies to watch later.
- **Movie Details:** Explore in-depth info and user comments.
- **UI Refresh:** Smoother, more engaging interface.
- **Suggestions:** Personalized picks on the homepage.
- **Watched History:** Track what you've seen.
- **Profile Enhancements:** More personalized user settings.

FUTURE SCOPE

- **Smarter Recommendations:** Improved movie suggestions using advanced algorithms.
- **Social Features:** Share lists and reviews with friends.
- **Cross-Platform Content:** Find movies across multiple streaming platforms.

TOOLS USED:  python

PACKTRAVEL

-Effortless Rides, Endless Destinations!!

INTRODUCTION

PackTravel simplifies off-campus travel by connecting you with cab rides, rental cars, and carpooling options. Whether you're heading out for a quick trip or planning something longer, PackTravel helps you find the best ride with ease.

WHAT'S NEW?

- **Today's Rides:** Quickly find rides available today for easy travel.
- **Multiple Filters:** Refine your search with more options to find the perfect ride.
- **Contact Authorization:** Request permission to access driver details directly from the ride owner.
- **Notifications:** Get alerts when your preferred ride becomes available.
- **New Ride Details:** Now view additional ride information like vehicle type, vacant seats, and estimated price.

FUTURE SCOPE

- **Future Scope Ride History:** View past rides and their details for easy reference.
- **Carpooling Enhancements:** Improve the carpool experience with better matching.
- **Ride Sharing:** Enable users to split the cost of rides with fellow passengers.
- **Smart Notifications:** Predictive alerts based on ride preferences and past selections.
