

COOKSMART

Tired of not knowing what to cook with your available ingredients? Meet COOKSMART, a smart application that turns your kitchen inventory into delicious meals. From finding recipes based on ingredients to bookmarking your favorites, we've revolutionized home cooking by making it an exciting and seamless experience!

WHY COOKSMART?

Chef's Personal Assistant

Create your very own profile to keep track of all your favorite recipes, preferences, and bookmarks in one convenient place.

Recipe Stash

Found a recipe you love? Save it instantly with our bookmarks feature, so you can access it when you're ready to cook up something delicious.

Crave and Find

Got a dish in mind? Just type its name (like "enchiladas"), and we'll find the perfect recipe for you to whip up!

Pantry-to-Plate

Enter the ingredients you have on hand, and let us suggest tasty recipes to help you make the most of what's in your kitchen.

MAKING IT BETTER !!

Recipe API Integration/Scraping

Implement API calls and web scraping methods to fetch recipes from external sources.

Automated Grocery List

Develop functionality to automatically compile a list of missing ingredients for selected recipes.

Recipe Sharing

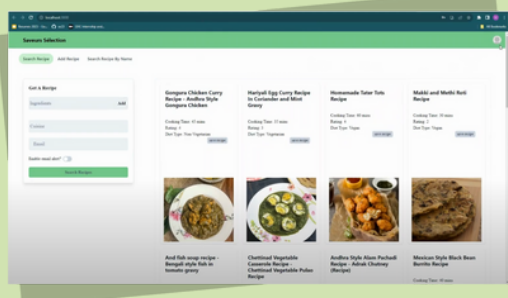

Integrate social sharing functionality, to easily share their favorite recipes.

Advanced Recipe Filtering

Implement additional filtering options, such as cuisine type, cooking time, and dietary restrictions.

UI Modernization

Perform a comprehensive overhaul of the user interface to improve usability and aesthetics.
