CSC510 SOFTWARE ENGINEERING PROJECT: SLASH, 2022.

ABOUT

Slash is a Python/Flask-based web tool that allows you to search for any products from your favorite stores. With great features like sorting by price or name, Slash provides a simple yet powerful interface to use. Currently Slash supports searching for products at physical stores like Walmart, Target, and Costco, and additionally online stores like Ebay and Amazon.

TEST CASES : 10+

UPDATES

- GitHub Pages Deployment
- Support for other browsers than Chrome
- Selection of specific stores to search from
- Pictures shown with search results
- Python upgrade and improved testing.

LOOKING FORWARD

- Caching of results for better performance
- Additional filtering options for results
- Improve reliability and reduce crashes.
