

SHOPSYNC

YOUR ULTIMATE BARGAIN ALLY

Discover and save deals more effectively while tailoring the platform to their unique preferences.

WHY CHOOSE SHOPSYNC?

Save Time: Find the best deals in half the time with our smart comparison tool.

Easy to Use: Our simple, user-friendly APIs make bargain hunting hassle-free.

Smarter Choices: Customer reviews and cashback options help you shop smarter.

Modern Shopping Experience: A sleek, polished interface makes browsing fun and easy.

Shop Everywhere: Access deals from multiple e-commerce platforms, all in one place.

PROPOSED WORK

Autogenerated tag filters

Implement autogenerated tags that allow users to refine their search results, making it easier to find exactly what they need.

Personalized Recommendations

Use users' search history and preferences to generate tailored product suggestions, improving relevancy and boosting user engagement.

Wishlist Feature

Enable users to save and monitor desired products with a wishlist, making it easy to track price changes and availability.

API Optimization

Enhance API performance to deliver faster response times, ensuring smooth and efficient browsing even during high-traffic periods.

UI Revamp

Further refine the user interface to create a seamless, intuitive, and visually appealing experience that keeps users engaged.

CURRENT FEATURES

Comprehensive Price Comparison

Seamlessly compare product prices across Amazon, Walmart, Target, BestBuy, Costco, and eBay to ensure you're getting the best deal.

User-Friendly Filtering & Sorting

Effortlessly filter, sort, and search through thousands of deals, making it easy to find the perfect price for any product.

Chrome Extension Integration

Enhance your shopping experience with our Chrome extension, enabling price comparisons and deal tracking directly from your browser.

Rakuten Cashback Insights

Boost your savings potential by integrating Rakuten cashback insights, helping you earn money back on top of unbeatable deals.

User Ratings and Reviews

Make informed purchasing decisions by reviewing user ratings and feedback, ensuring the product meets your quality expectations.
