

## Objective

- Facilitating Flat Searches: Users can filter apartments by location, facilities, and lease dates.
- Streamlining Subleasing: The platform enables quick subleasing, saving time and costs for users.

## Features

- User-Friendly Interface: Simplifies apartment searches.
- Enhanced Search Filters: Advanced options for finding suitable apartments.
- Real-Time Notifications: Updates on new listings and application status.
- Secure User Authentication: Protects user data with secure login.
- Scalable Deployment: Built with Docker for improved performance and reliability.

# DenFinder

## Our Proposal

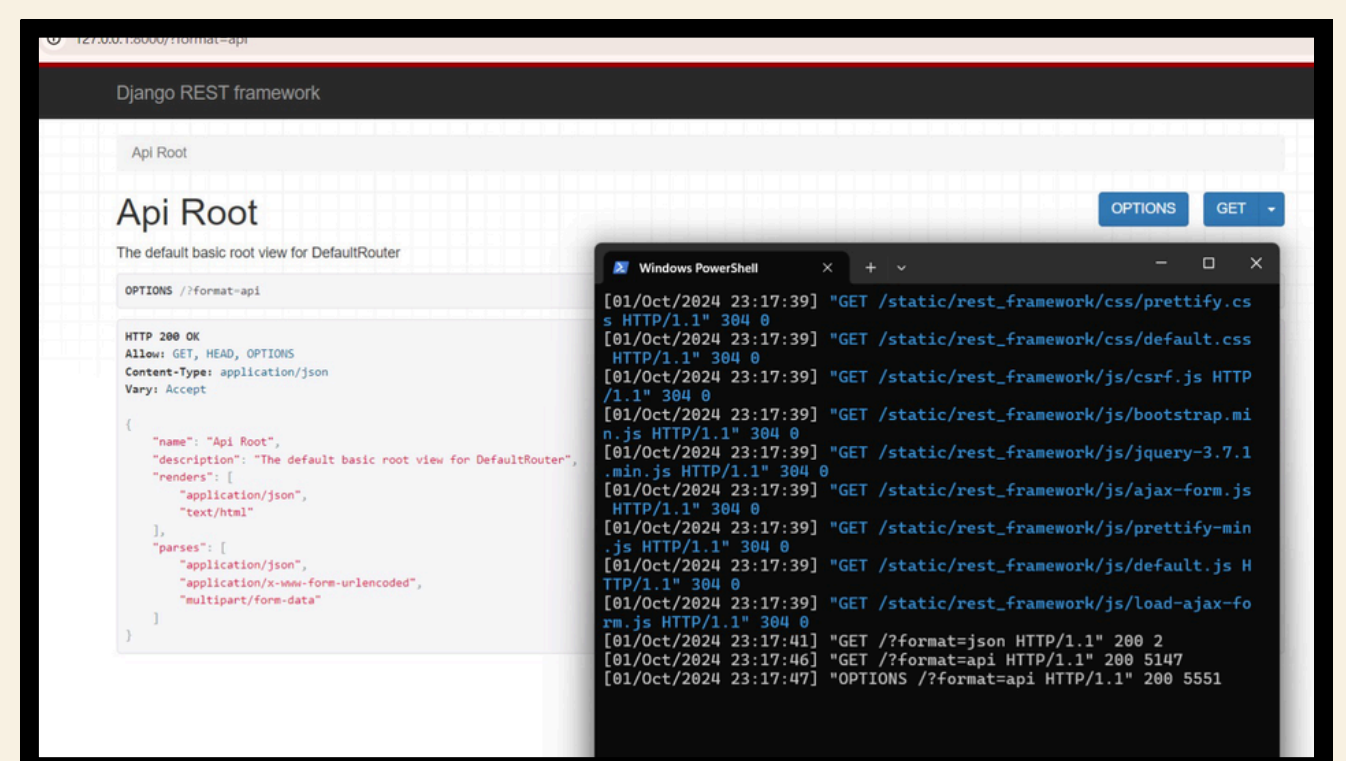

- Enhanced UX: Responsive design and feedback system.
- Advanced Filters: Granular options for pets, parking, and lease terms.
- Real-Time Notifications: Alerts for new listings and application updates.
- Admin Dashboard: Management tools for users, listings, feedback, and analytics.
