Introduction

Finding your perfect home has never been easier! Explore, rent, and settle in faster with seamless listings, detailed insights, and document sharing—all at your fingertips!

Test Cases

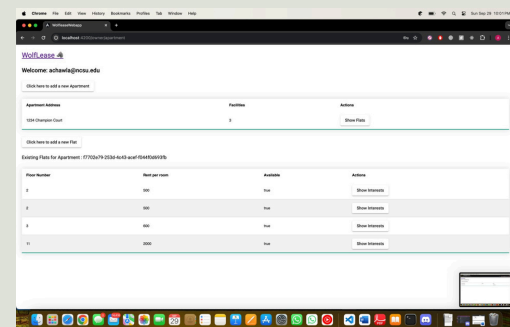

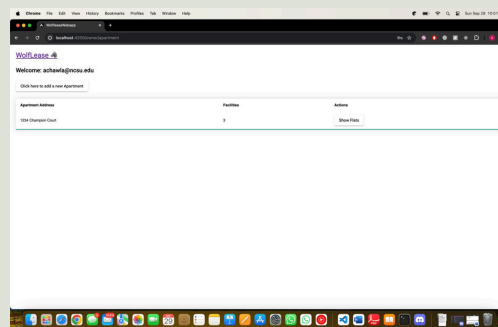

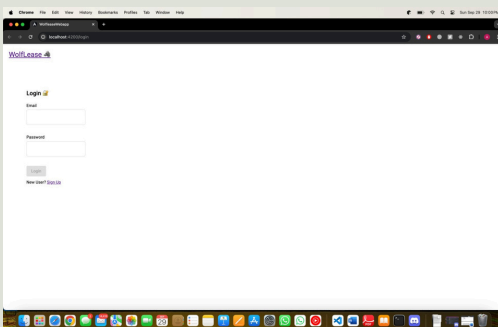

Frontend test cases - 20+
Backend test cases - 20+

Milestones

- **Enhanced Property Listings**
 - Design and implement a new property listing template that includes detailed descriptions, amenities, utility information, and images. This will provide users with a comprehensive and visually appealing presentation of property details, enhancing their browsing experience.
- **Property Reviews and Comments**
 - Develop a user-driven tenant review system that enables tenants to leave reviews and comments on listed properties. This feature will be integrated with the existing property database, allowing prospective tenants to access feedback from previous occupants.
- **Automated Email Notifications**
 - Implement automated emails for key events, including new property listings, application status updates, and renewal reminders. This feature will keep users informed and engaged, ensuring they never miss important developments in their rental journey.
- **Streamlined Document Sharing**
 - Create a document upload feature for property rentals that allows users to securely share files. Track uploads and downloads to ensure efficient management of rental-related documents.

Sells the Project

- Comprehensive Property Listings
- Improved Property Match for Tenants
- Seamless Document Upload and Management
- Efficient Tenant Screening for Property Owners
- Accelerated Leasing Process
