Recipe Recommender

Team 20: Thien Do, Nathan Lorenc, & Jake McDavitt

Introduction

Do you need help keeping track of recipes and meal planning? Introducing Recipe Recommender, the powerful web application designed to make your cooking adventure easier.
Continue this well-tested project and create the solution to your problems!
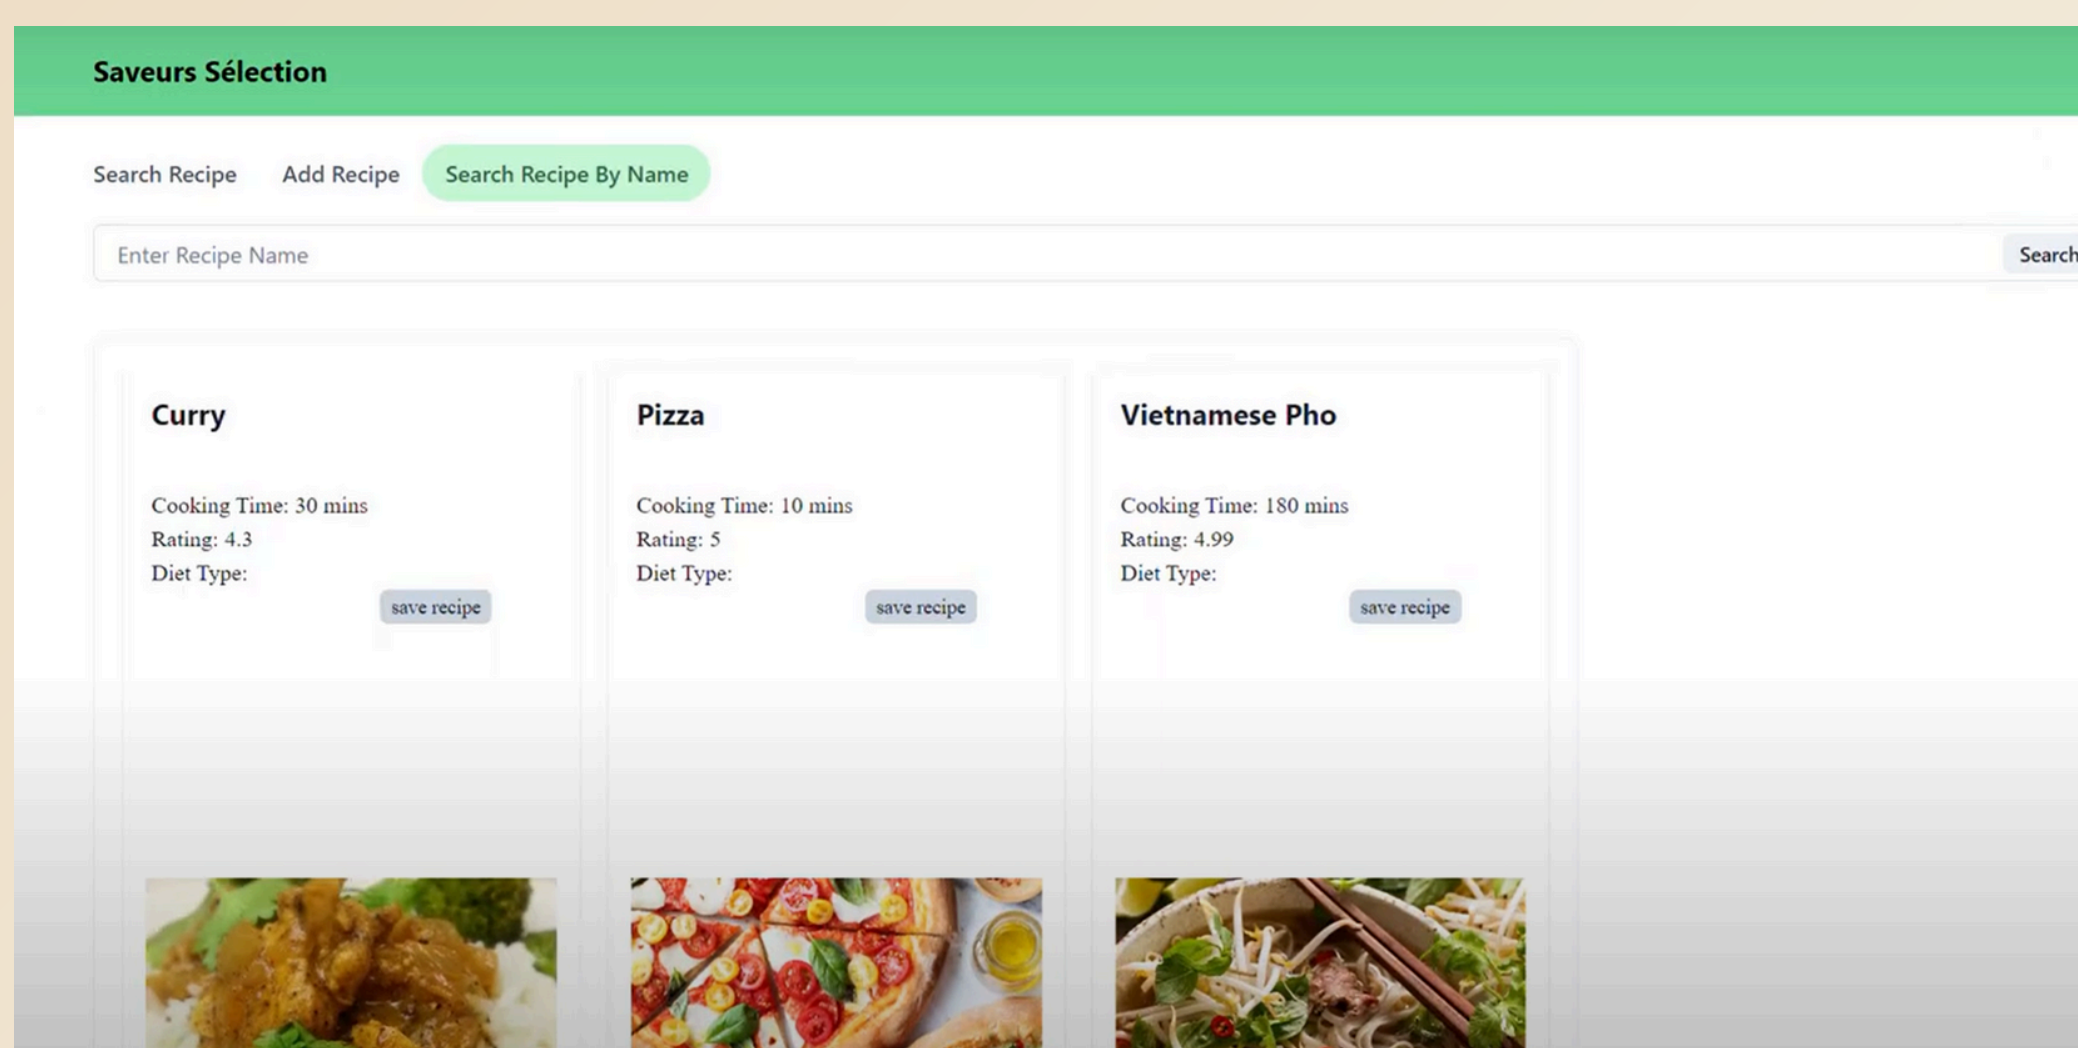

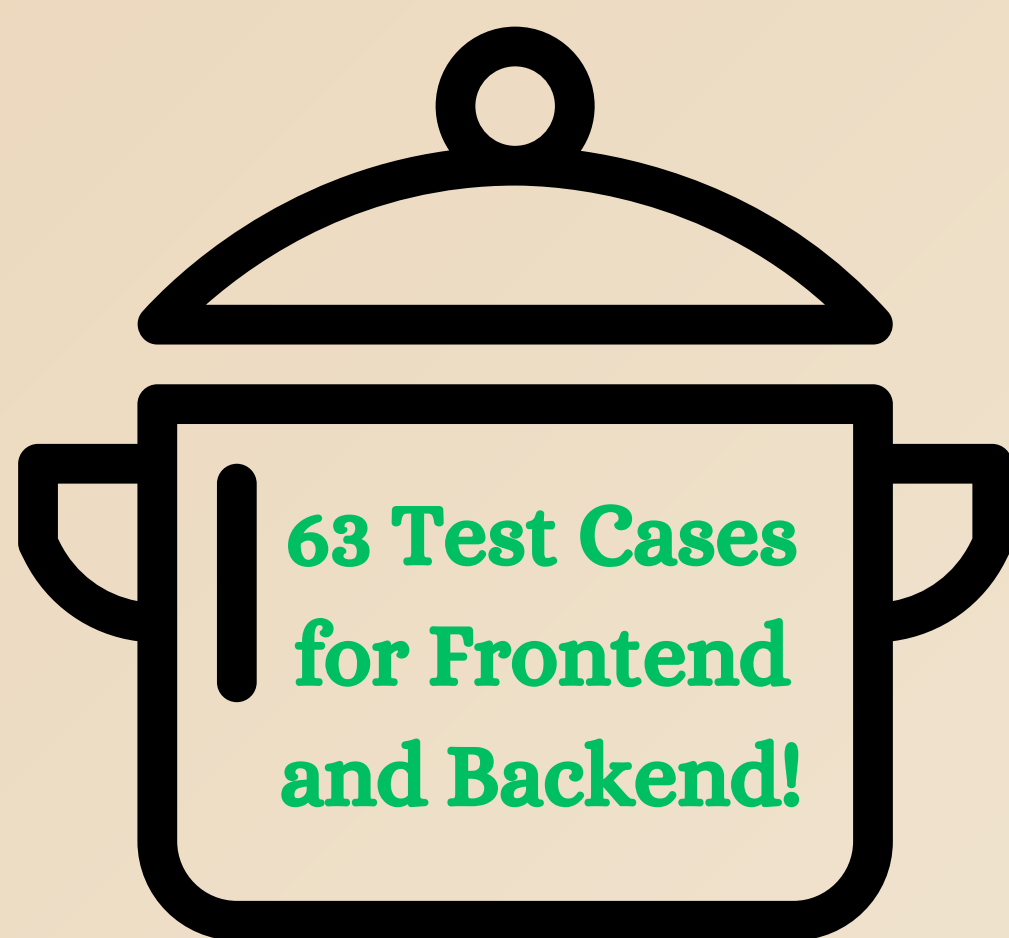

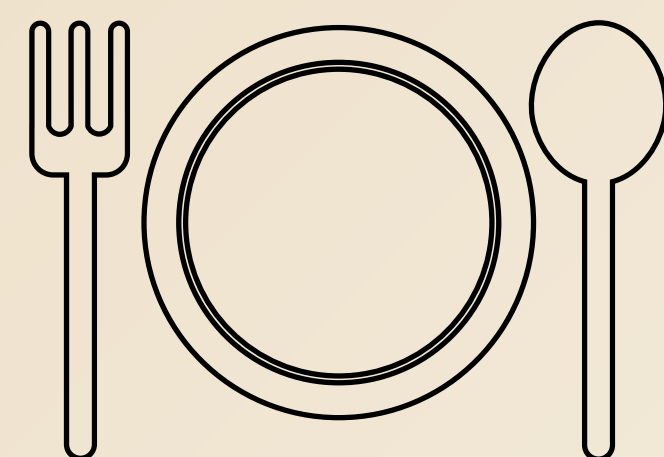

Benefits of this Software

- Simply organizes the recipes that a person has liked before
- Allows the person to search for recipes that match the given ingredients they have on hand
- Shared recipe service with multi-user support
- Can link the recipe to the source through a website URL to show the alterations they make
- Automatically linked to YouTube for more tips on making the recipe

Implementation Milestones

- **Improved Rating System:** Adding a slider/star system for rating the recipes with a community factor
- **Recipe Image Selection:** Having an image upload button and a Google Images search option to have a picture for the recipe
- **Meal Planning:** Allow Users to create a Meal Plan with Recipes stored on the application
- **Chatbot Integration:** Chatbot Integration for simple questions about the recipes using Ollama
