JobCruncher

Group 59 - Ishwarya Anandakrishnan, Abishek Viswanath Pittamandalam, Ashwinkumar Manickam Vaithiyanathan
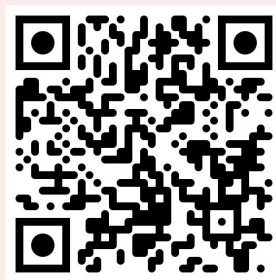

About!

- JobCruncher is designed for busy individuals juggling multiple commitments, simplifying job search.
- Simple, lightweight tool that helps users efficiently find and filter job postings, saving time and effort.
- Provides clear, up-to-date job information with daily scraping of new postings.
- Offers insights into job postings to help users make informed decisions.
- Features login and input pages for personalized searches by job title, location, company, skills, and job type.

What's new?

- Enhance security with 2FA and password recovery/reset options
- Add recruiter page for job management
- Email alerts for new job openings
- Save resume as PDFs
- Bookmark job postings
- Provide interview prep resources and Google reviews for each job listing

Future scope

- Leverage AI to match jobs by analyzing resumes instead of manual input
- Offer a resume analyzer with ATS scoring for optimization
- Allow users to customize and modify resumes for specific jobs
