# Slash

Do you love shopping? Are you in search of some good deals while shopping online?! **Slash** is here to help you look for the best deals!

Slash is a publicly accessible web API framework that allows one to scrape the most popular e-commerce websites to get the best deals on the searched items across multiple e-commerce websites. Currently supported websites include Amazon, Walmart, Target, BestBuy, Costco and EBay.

Current **Features**

- Login session Added
- Added history of products searched
- Mobile App fixed in Flutter
- Fixed website search
- Compare prices and deals to find the best offer.
- Easy-to-use interface for quick navigation and search in Flutter
- Redirect to the respective app/website in Flutter
- Chat channel added
- 100+ testcases covered!

Future Improvements

- Export CSVs and PDF: Enable exporting search details to CSV or PDF files for easier sharing and analysis.
- Improve the Flutter UI to make it more intuitive
- Multicurrency Support: Show product prices in different currencies
- Improve search capabilities by adding filters
- Adding support for more merchant websites such as Temu
- Add feature to compare product specifications
- Enhance security by adding features such as two-factor authentication, etc.
