SLACKPOINT

GAMIFY YOUR WORK

ABOUT:
SLACKPOINT IS A SLACK INTEGRATION THAT GAMIFIES TASK MANAGEMENT. USERS CREATE, ASSIGN, AND TRACK TASKS, VIEW PENDING AND COMPLETED TASKS, AND COMPETE ON A LEADERBOARD.

NEW VERSION'S FEATURES:

[MILESTONE] UPDATE EXISTING CODEBASE:

- **SUPERCHARGED SLACK WORKFLOW INTEGATRATION**
  - Our Plan: Build custom Slack workflow steps to integrate SlackPoint features like task creation and updates. Offer pre-built templates for easy team adoption. We'll enhance our API and update documentation to support these new integrations.

[MILESTONE] IMPLEMENT NEW FEATURES:

- **EFFORTLESS COLLABORATION WITH TEAMMATES TO ACHIEVE MORE**
  - Our Plan: Launch a new Slack workflow, request-help [task ID], enabling users to request assistance on specific tasks. Teammates will be notified for collaboration, with the option to assign multiple users. Documentation will be updated with usage instructions for this feature.

- **STAY ON TOP OF YOUR TO-DO LIST, LET NOTHING SLIP THROUGH**
  - Our Plan: Implement an automated reminder system that notifies users of upcoming or overdue tasks. Users can customize reminder settings, with notifications sent directly through Slack for maximum visibility.

- **FOCUS YOUR TEAM ON DAILY STAND-UP AGENDA TASKS**
  - Our Plan: Develop a feature that compiles each user's pending and recently completed tasks into a daily standup report. Schedule automatic posting to a designated Slack channel at a set time each day, with customization options to tailor the report content to team preferences.

[MILESTONE] INCREASE TEST SUITE WITH TEST CASES MORE THAN 5X

- Our Plan: Expand our test suite significantly by increasing unit and integration tests to over five times the current number. Utilize tools like pytest-cov for code coverage monitoring and integrate testing into our CI/CD pipeline with GitHub Actions. Set measurable code coverage targets and foster team collaboration to uphold high testing standards.

CURRENT FEATURES:

- **REAL-TIME NOTIFICATIONS:**
  - Stay in the loop with instant updates when tasks are assigned or completed- never miss a beat.

- **ENHANCED TEAM COORDINATION:**
  - Effortlessly view pending and completed tasks, track progress, and keep your team aligned for maximum productivity- so everyone can stay accountable.

- **ENGAGE IN HEALTHY COMPETITION:**
  - Get competitive with the leaderboard feature. Check your ranking and challenge team members for the top spot- make teamwork fun and motivating.

- **SEAMLESS INTEGRATION:**
  - Experience true convenience with seamless integration that works directly within Slack- no need to leave the app!
