About Slash

- **Search different sites** for the best deals
- **Track prices** of different products to get the best deal you deserve
- **Enhanced user interface** that lets you quickly navigate the product catalogs
- Skip looking for offers on individual websites when we get you the best deals from all the popular e-commerce platforms out there

Current Version

- **Added wishlist**s to track your favourite products
- Newly added **sorting based on price** for hassle free shopping
- We now **highlight the cheapest product** for budget purchases
- **Fixed minor yet annoying bugs** on the portal
- We have a pipeline to run **10 test cases** that **cover 100%** of the core functionality of the product
- Designed in **Streamlit** and is easy to run and manage at this scale

Proposed Improvements

- Break the application into **Microservices** to easily scale it to larger set of users
- **Revamp the UI in React** to improve the user experience and help with user retention
- Add **data collection** functionality to help design intelligent recommendation system predicting price drops
- **Open** the platform **to Sellers** to directly post their products on the platform
- **Price drop email alerts and tracking** functionality so users can buy their favourite products at the best price
